

VISION: LegoAir is a flexible, low-cost airline for adventurers. We aim to:

[] Make our first flight by: _____

[] Earn £___M by: _____

WIDE-BODY PLANE

So that I can fit a swimming pool, as a traveller I want a wide-bodied plane.

BASIC PLANE

So that I can explore Paris, as a backpacker I want a small, short-range jet.

(acc criteria: length > 2 inches, has wings, has engines)

INFLIGHT MOVIES

So that I'm not bored, as traveller I want inflight movies.

JUMBO JET

So that I make more £ per flight, as an owner I want a **big** plane. (double deck?)

(acc criteria: length > 5 inches, power/weight still OK, big landing gear)

FAST PLANE

So that I get more time on holiday, as a flashpacker I want a fast jet.

VTOL

So that I can explore out-of-the-way places, as an adventurer I want a VTOL.

SUPERJUMBO

So that I can sell cheap fares, as an owner I want a **massive** superjumbo.

INFLIGHT MOVIES

So that I'm not bored, as a traveller I want inflight movies.

NO TURBULENCE

So that I'm not sick, as a flier I want the plane not to experience turbulence.

FUEL-EFFICIENT PLANE

To save money, as an owner I want the plane to be fuel-efficient.

(big tailfin? bent wings? green engines?)

PRETTY PAINT

So that I can make cool ads, as a marketer I want the plane to be painted in pretty colours.

LONG-RANGE PLANE

As an Australian, I want to get to Australia without refuelling.

TAPERED WINGS

So that the plane flies straighter, as a pilot I want the wings to be tapered.
